

OPEN ACCESS ONLINE JOURNALS ON GENETICS: A STUDY

**Mr. Ambhore Sagar Pandit*, Research Student, Dept .of Library & Information Science
Dr. Babasaheb Ambedkar Marathwada University, Aurangabad.

***Dr. Khaparde Vaishali*, Professor and Head, Dept .of Library & Information Science
Dr. Babasaheb Ambedkar Marathwada University, Aurangabad.

Introduction

The proliferation of free accessible online journal, the development of subject specific pre- and E-print archives and collections of learning objects provides a very valuable supplement of scientific knowledge of the exiting types of published scientific information (book, Journals, databases etc.). however these valuable collection are difficult to overview and integrate in the library and information services provided by libraries for their user constituency. Open access journals as journal that use a funding model that dose not charge readers or their institutions for access.

Open Access Journals :

Open access means users can read, download copy, distribute, print, search, or link to the full texts of these articles. Open access journals are scholarly journals that are available online to the readers “ without financial, legal or technical barriers other than those inseparable from gaining access to the internet itself”. Open access journals (sometimes called the “gold road to open access’) are one of the two general methods for providing open access. The other one (sometimes called the “green road”) is self archiving in a repository. The publisher of an open access journal is known as an “Open access publisher and the process, “open access publishing”

DOAJ (Directory of Open Access Journal):

At the first Nordic Conference on scholarly communication in Lund/Copenhagen the idea of creating a comprehensive directory of Open access Journals was discussed. The conclusion was that it would be a valuable service for the global research and education community. Available technologies make it possible to collect and organize these resources in a way that allow libraries worldwide to integrate these resources in existing services thus offering added value no the for the service providers of these resources and for the global research and education community. Directory of Open Access Journal is a service access to quality controlled Open Access Journals. The Directory aims to be comprehensive and cover all open access scientific and scholarly journals that use an appropriate quality control system and it will not be limited to particular languages or subject areas. Directory of Open Access journals is hosted, maintained and partly funded by Lund University Libraries head office DOAJ is receiving funding form.

Objectives of the paper :

- To enumerate the free E-Journals on Genetics on DOAJ
- To know the country wise distribution of E-journals on Genetics on DOAJ

- To find out the language wise distribution of E-journals on Genetics on DOAJ
- To know the accessibility of archives of E- journals on Genetics on DOAJ
- To know the usefulness and applicability of Genetics E-journals to other disciplines.

Research Methodology :

DOAJ (Directory of Open Access Journals) website (<http://www.doaj.org>) is browsed for the present paper Genetics E-journals were searched out and 57 journals were found on DOAJ Total 57 Genetics E- journals were analyzed based on countrywide, Languages, subject Headings and accessibility of Archives of E-journal.

Limitation of the study :

The study is limited to Genetics E-journals which is listed on Directory of Open Access Journals for the present paper DOAJ data is accessible till 25/06/2014. It is not possible to show all the online journals access so access of only one e-journal's full text article is shown at last as a screen snapshot.

Analysis and Interpretations :

Total 57 Genetics E-journals were analyzed based on Countrywide, Languages, Subject Heading and accessibility of Archives of E-journals and presented in the form of Tables.

Table : 1 List of Free E-Journals on Genetics on DOAJ

53	Stem Cell Discovery	stem cell and diseases, tissue regeneration
54	Stem Cell Studies	stem cells
55	The Application of Clinical Genetics	population genetics, natural history, management and mechanism of genetic disease
56	The Internet Journal of Genomics and Proteomics	genomics, proteomics, biotechnology
57	Turkish Journal of Biochemistry	biochemistry, molecular biology, molecular genetics, biotechnology, bioinformatics, bioengineering

Table : 5 Intended to make for searching accordingly to Subject Keywords in online Journals on Genetics. Table indicates the useful keywords for searching in each online journals on Genetics so that user would not waste their time by browsing broad Keywords.

Findings :

1) It is observed that U.S. was in 1st rank in publishing 15 e-journals followed by U.K. (From Table.2)

2) English is the most common communication language for scientific community which is used by online journals. Four e-journals on Genetics also published simultaneously in English, French, Germany, and Turkish languages. (From Table3)

3) It is observed the Genetics, Biology (General), Science e-journals are interdisciplinary in Nature. Out of 57 e-journals, 47 e-journals are useful for Genetics as core subject. But genetics journal can also be useful for Biology, Biochemistry Botany, Science, Genetics, Biology (General), Science Cytology, Biology, Genetics, Biology , Medicine (General), Science, Biology (General), Genetics,

Conclusion :

DOAJ is comprehensive and covers open access scientific and scholarly journals that use an appropriate quality control system, and it will not be limited to particular languages or subject areas. DOAJ is to increase the visibility and ease of use of open access scientific and scholarly journals there by promoter their increased usage and impact. Research scholars, scientists, Professionals should browse the DOAJ site and access the free online journals on their subject areas It is also suggested that scientists and Research scholars should publish their research work in online open access journals for wider visibility of their research work and for greater impact factor and citation index.
